P

Dear Sr

Just back from a
nine days trip to San Francisco
To lay in supplies &c &c. found
Everything in "state quo" at Academy.
Prof L. & "amabiles" flourishing! I
made Muir a short visit. They all
wished to be remembered. Loaded
me down on leaving with 2 bottles
of wine want you to repeat your
visit in grape season. Muir expects
to be a father" in a month" and is
of course in the 7th. Heaven of Expectation.
I invested in B.A. Cal Voc 2nd
which I will take out to Prescott
when I go - Fancy Vases & Ferns
are staying with Parish & I see
Wright occasionally.
Next week I expect to go on a
prospecting tour as far as Tucson
will travel as far as I can by
daylight to pick out desirable

Jan 13 '81

What fearful weather you are having! but it leaves you no excuse for deserting this warm, clime. It is delightful most of the time warm days & cool frosty nights vegetation coming on slowly.

I think of taking my lady folk a winter trip overland to San Diego we an very nicely fixed here now The new Transcontinental Hotel is about opening - and will be a great addition to San Bernardino.

Crossing Mojave Desert I snatched a few seed of our new Clematis & will try & raise it. Time picking there in March & April.

I dined with Behr at 5 7. he had just heard from you & was pleased. Mrs P. & sister are busy with house arrangements desire compliments. & the napkin ready for you - here?

localities will do what the season allows in collecting & noting Cacti Again &c &c ready for "5 minute" examinations hereafter.

Sargent writes that he expects to send Pringle out next Spring for Census work in N Mex Arizona & S. Calif wants me to post him. &c. he seems to be energetic and a good collector but he wants funds. Difference between Vermont and Arizona in the hot Season. and I will take a year to "learn the ropes" and know what & when to collect - but there is room for all good fellows.

I still hope you will come in March and later furnish up those new species and make (more?) sure)

I am inclined to side with Hooker & consider the Calif. Abies one color? Distinct from Utah. I wish you could see the Wasatch forms!

MISSOURI BOTANICAL GARDEN

I shall put your blankets to use before long; am well supplied with paper & boards, &c.

Parish's arranging plan for excursions in various directions want to "take you in".

Opuntia macrosperma seems to vary considerably in size & length & color of spines. I could only recognize the two species cross over to Mojave. Of. mac- grows taller to O. rhodantha.

Greene should have O. Davisii must punch him up.

When you publish, send scraps. not to "flatter" but instruct (i.e "instructive" scraps). Yes we shall soon pay for articles. Echeveria could be blended to "your bet"

Ever yours

Dear Dr

In the mail parcel sent
two specimens of Q. arbuscula. & Q. echinocarpa
and 4 branches with old & young leaves of
Quercus.

I take this letter to be = to the San Gabriel
tree which I have yet seen only from
the Cars. My specimens were from
the divide between Temecula & San Luis Rey
rivers about 60 miles from Coast
Tree medium sized occasionally quite large
Trunk topped, with wide spreading branches
bark dark colored deeply furrowed.
Did not look to me like Q. Douglasii
old leaves shedding not evergreen.
I shall see more of it later on.
Take notes measurements & specimens
A little under the weather just now
from sleeping on damp ground &c
Shall expect one to hear when to meet
you at Denning

but I must decline
Lemmon was to El Paso to return
to Berkeley next week. he is much
concerned over his Yucca and state
such - N is not an Agave - and
will go [illegible] specimens & good way
Oliver I think he will do little
in your specialties. which I am sent
him -

Jones stopped by me to Thursday
night I went to the office of the Democrat
to meet him took a sudden start &
so I missed him. Very sure on the
Rio Grande has a R R pass on the A. T. &
S. Fe and is getting "nice things"
So I "hit the mark" in sending a 2 cts
parcel of Lemmon before me & I got Col
Kellogg to put me on the right track
"Took Sh" of Col Kellogg's spirit and joked
over the ground for half a Day finding
only the "miserable D. t" so as soon you
might share my Dinner I sent you the

[illegible] you should have got 50
specimens from Lemmon. I have since
seen a circular from San Gabriel. this
letter date I stay here a Early as possible
as I can jump on the RR any afternoon
& 3 hrs stay in a pass I'll get a Lemmon
a back to Jupiter. Curious enough
the first time I went down. waiting
for the nearest train Mr Col Dalrymple
with his wife & [illegible] came in Col Gl & this
Col Dalrymple recognized me as I embarked my
Col Douglas's but ask the like how upon
was pleasure Col Stonefield. Sent out of the
specimens of both I am sorry not for you
I called at the house the Doctor on the
depot to Col after at was a good friend
and must be "well D".
We are now on the Eve of a trip to
Yosemite perhaps to be gone a month
Last week I took a short trip with
Saunders & Lemon Mrs a Clark on the road
They wants me & go to Aspen this week

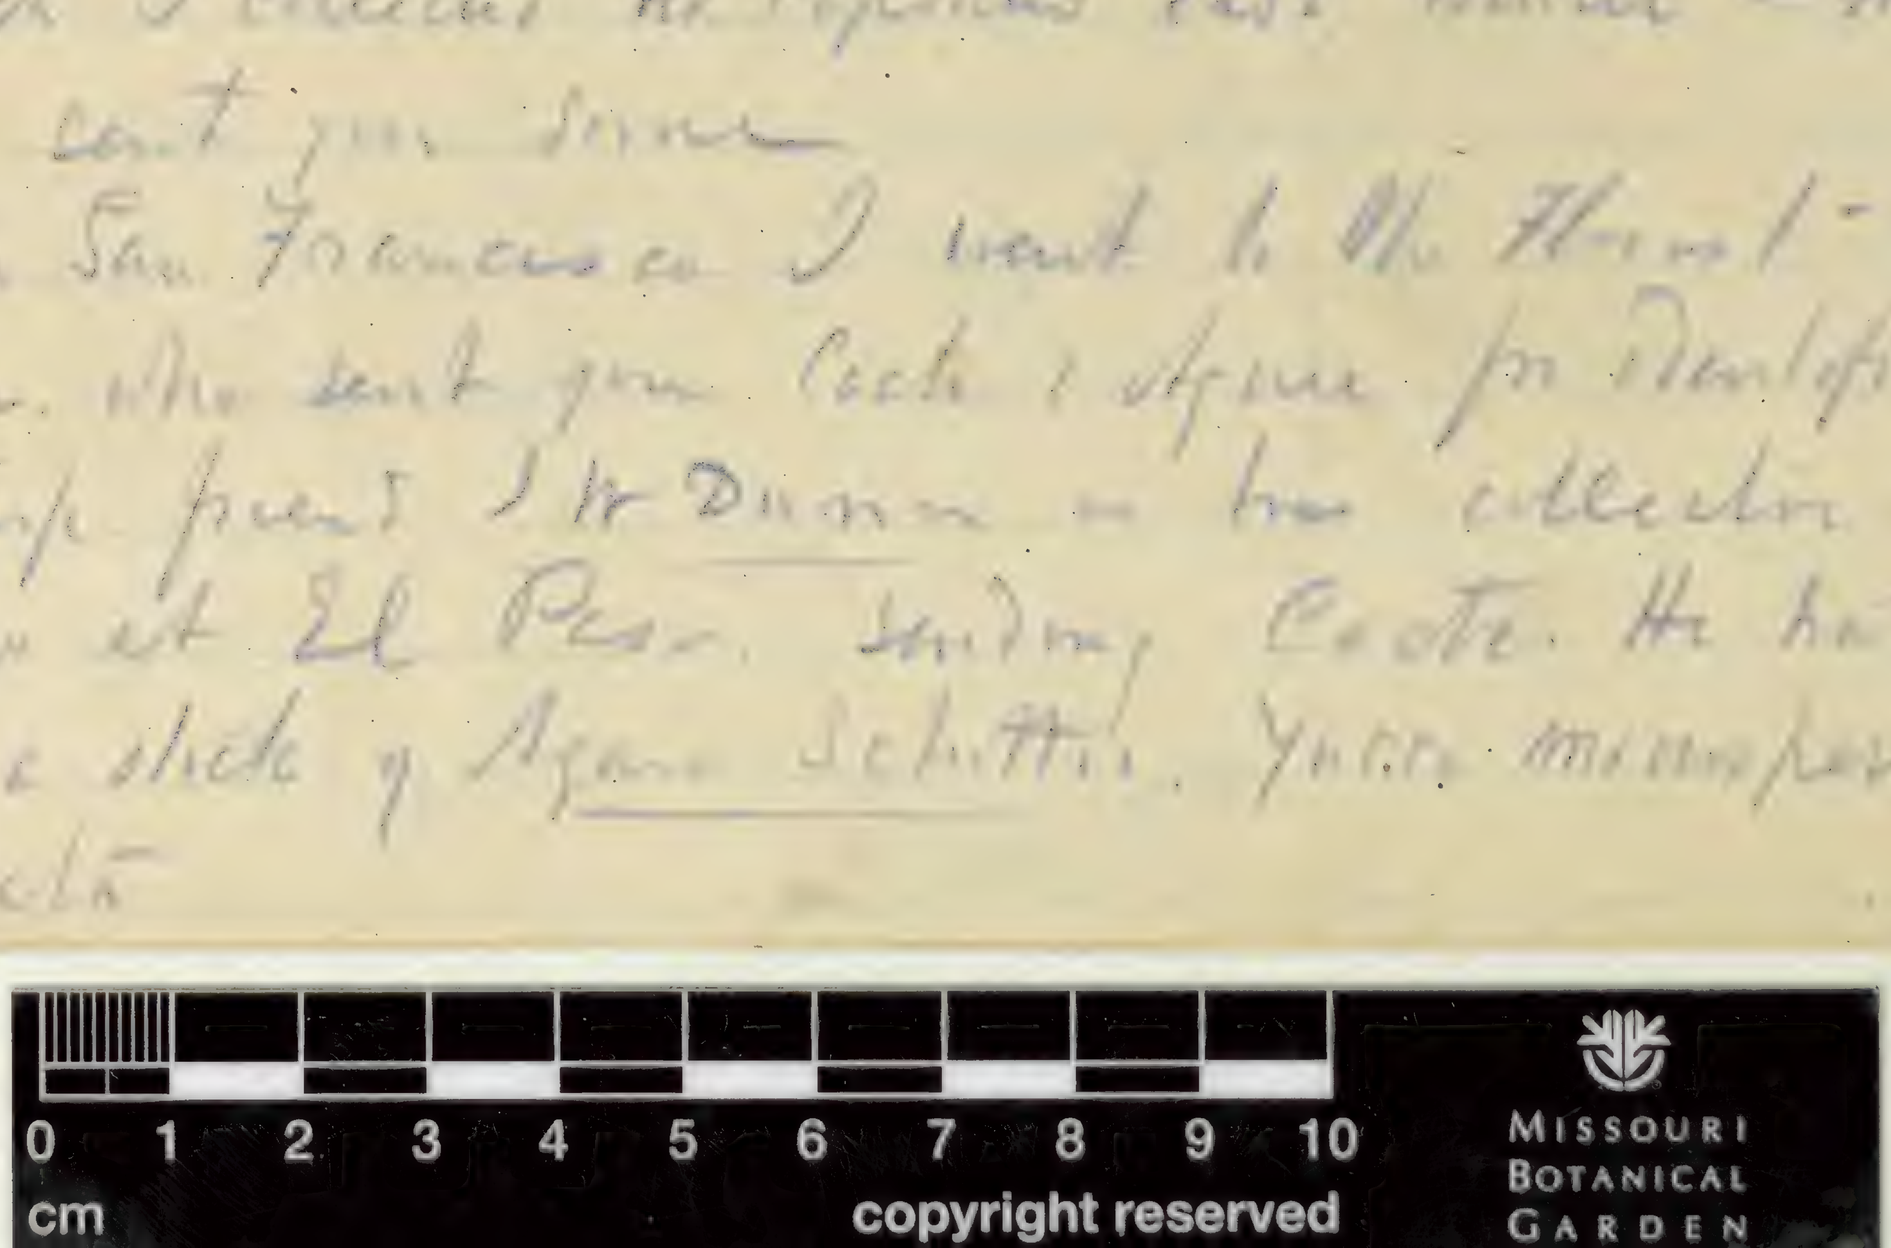
Mariposa Grove!

Dear Sir

Yours of May 28th follows me here
I am fairly caught in the Yosemite Winter and
must get out of it the best way I can.
I am off to San Francisco before coming
home and leave Lemmon & Kellogg. but
will Too little Time to Botanize botany
Look you before mine & Oh Eschscholtzia a
new Eschscholtzia Day State of Lond. & Nuttall
about on this & fr before. I found nine of the species
as you make out
I have not collected much of Oh Eschscholtzia a pl
though I dare say will be interested from seeing some
of Oh Benthamiana. The Yosemite from the Day for it
of which I collected 24 species last winter & must
have sent you some
When in San Francisco I went to the Head-
Miller. who sent you Cook & Agave for identification.
Can Shasta found Mr Dixon in his collection as
was done at El Paso. Sending Cactus. He has
sent a stick of Agave Schottii. Yucca microphylla
& Elata



MISSOURI BOTANICAL GARDEN

Had a fine day here about Y. slata. Which I have
seen flowering well in cloud since 1867 & when I
first saw it collected Lecd as "Y. hesperica" and now I
see it "Y. Bergii Torrey" — You did not give me Ict
for this if forwarded (or I missed it).
I do not know what I shall do in the Bark
line this Fall. Stuff like Bolanders has been
picked up near Yosemite!
Seems has not much to say about Cacte Agave
or Liliaceae. Dec. not "like them". Seems rather
disgusted in Berkley & anxious for N. Mexico.
Valley is still at Fresno
Perhaps make a late trip to Mojave but without
much results the late part of day.
I met Pop Milford a few minutes at Berkley
introduced Greene to him.
Cool & pleasant here now may be cold
in the Mts. I think we will break camp in
2 weeks with to Los Angeles till a time
then will report when I get back
Trust Dodie & Ted remember us with you
with us.

Best

MISSOURI BOTANICAL GARDEN
GEORGE ENGELMANN PAPERS

Le June 25. Acad Science San Francisco June 22nd/81

Dear Sir

I did not wait to get your letter before answering it (a bull) mailed this morning from Oak Scrub from foot-hills of San Joaquin Valley.

Q. Douglasii showing the stigmas. Q. lobata. and a curious form of Q. Kelloggii approaching Q. Wislizeni. with apparently evergreen leaves? Sp of Q. Wislizeni from the same district to show the range. There are all the Oaks I saw on the route — Mrs Jr. San Gabriel.

I have noted a notched leafed oak grown with Q. oblongifolia. which I take to be Q. Douglasii the two growing side by side. wide want for more material to settle it. I do not think Q. oblongifolia is subject to evergreen though the leaves persist more or less the spring as they do in fact in other deciduous species Q. lobata for instance I have specimens of also to show how it is. but Pfeudo Fremontii does the same and they are not just by Evergreen like the live oaks. possibly further South the persistent habit leaves are more common. So much for oaks

I might tell you more about Yosemite but am not in a description. You must take it before it gets too fashionable. It can hardly be spoiled. My ladies included to enjoy it during a fortnight in a month. There. I got drenched 3 times on the trip & the falls hunting Dodecatheon Shoot Hardy & Botrandra but I am getting specimens of them. Mariposa Tree. Specific Separation. Calochortus Albicans. Subspecies. Some of them Scarcely worth the name.

Collected Fimbristylis Diphylla, grows in moist soil in the base of Yosemite falls. (noticed a single specimen with the Cuscuta. Infolium Menziesii &c. tomorrow I have an appointment for a trip with Prince to Sierra & Cliff House. I shall thank Sadly of the anniversary of our visit to that glorious Western Trip June 23rd 1880. when you seemed so lovely and accomplished a quick. Lemmon is home with his wife using up the remnant of an Evening. RK has got a trip to Salt Lake. I am more lucky since making up with Edward & Mrs Dec 31st 1881. Parents well &c.

I pin him on a Mt Diablo ticket you be ready by four oc. Or may not I am frightened I found Stellaria Borealis in the Alleghanies but Pam the Shasta region did not find Carduelis

June 22'81

I See I am violating the rule to write on only one side but I think there is nothing you will want to cut up & save
You should have got Sp & Oh Bernardino with conspicuous leaves in Purple attached to the Arizona Oh.? Keene seems rather disgusted at leaving his dear Magdalena Mts in the height of the Season. Vasey now at Albuquerque & the Santa Rita Mts.
I expect to make Head quarters near Tucson for the warm season so you had better address there to Acad Science. Kellogg keeps on as usual & is delightfully cool here as you will remember Aug 3d at Lone Mt. fruit of all kinds in great abundance & better quality than last here they are not stale expect you later in the summer & can I meet you in Arizona for many Leaves I must go & see Dennis St Pete: and Butler will close for the present — & Let you & your Example rule the Date of your letter "May 31-82" as did Lecture!

Yours truly

C C Parry

Dear Dr

I have your letter of late date. answer prompt
You do right to characterize my oak search as
"miserable though interesting" they were. Indeed. for
what you may think (not me but) the stage driver who
left me behind on the road. by the same mishap I also
left specimens of Staphylea Bolanderi in fr.
I really did not look at Q. Wislizeni? except to
say here it is! The last thing I should have thought
I would be Q. agrifolia var. but you know I have
seen it before and so next time I shall keep my
eyes open. The Sub Evergreen Q. Kelloggii is
almost as bad. Kellogg says it is his Q. Morrhens K.
but who knows?

I suppose I did not get Leid your specimens (and why
of the lobe leaved. San Gabriel oak. It seemed at the
time to look the peculiar blue state of foliage. but
the tree is shotted and will be visited again by me (for.?
I must also have missed sending you my sketch
of D. Ribesifolia. shall I now find one for your
shapes & Violacea* All this thing will be shaped
out during the Season & become fat.

* Sketch not found perhaps lost?

I am detaining U.S. 31

Dear Sir-

I have been spending the day with Greene at Berkley he has just received a nice lot of plants from Howell & Sucker Island Oregon

He mentioned incidentally you proposed to seek Mountain in Colorado. This is encouraging if he will join forces this way, and one third of the journey - for will not fail to make the ski 2/3 for can pave for not only Mountain but Lea air and hot Springs "till you can't rest" So just get a through ticket. Which you can about & let me know when & when I need you this side of Ogden.

We have taken Sub permanent quarters as above which will be the safest P.O. address

Single expects to start on his journey to Hope & Washington Territory this month. he hopes to catch him on the home & jump him up.

I expect to go to Los Angeles & Colton next week to be gone only a few days, will buy & get specimens of Queens at San Gabriel, & see what Parents have one on my return will lay out some trips from here especially in the Hot Springs & beyond Calistoga. & wait for you

Reena has written to you about finding Sphagnum
papillosum near Berkley & Calistoga
I have just seen your last letter in Bot Gazette:
Do not get fall in with Jones, Lemmon's wife
still at Monterey "lecturing"
I have nice specimens of Ceanothus spinosus from
a cultivated tree in Los Angeles
So you are finally ventilating your views on the
perennial Eschscholtzia. which Everybody here says they knew
long ago. The Parish noticed it also in San Jacinto Pass
when it was Eschscholtzia perennial. in all other Inland
localities annual. It should be cleared up & this calls
to mind my late observations in Hummemannia. in
Mexico which in my view is only a perennial
Eschscholtzia. you must have specimens Torr & Coloner
time does it strike you?
This time a year ago we were in the Columbia. This
seems to be the leading year for Conifers. How will you
find it in Colorado? Write soon all your plans. Of course
you will go to Cincinnati in the best time in
time for Grapes just coming in!

Dear Dr

I am somewhat surprised by your curtic
movements, but am glad to know that you are
likely to keep cool. Even if not in San Francisco
I can just locate from a flying trip to the Peninsula
look in Lincoln Alleghenies by the way in spite
of unfavorable statistics on hilots Trains, which always
are to travel nearly 100 miles to go & but I
have got material enough to surprise you though
the balance of the hunted terra - matter for
study as of old me, but when am I sure?
The points around the springs and Mrs Peck describe
also the leaves. There is a glimmer within 5 minutes
walk from station, where you should camp for
a week "minimum". I am on two hands and
Jim and second back of chips for your
Sergeant, but now I must tell Dim Pete
I know where to reach you after Monday. I
had better leave for Lincoln (Nebraska) more anon
and again talk 5 pictures to Mr Lincoln. You
shall have the benefit & confusion of "first"
material

Dear Sir

Yours from "Bernardo Rds." with the
enclosure Overland received is = Comfortable in the
Sac Valley. I do not see why any body should
want to leave San Francisco in Summer for
Comfort the days are delightful the nights
Serene frost unknown abundant in Sacramento
valley. So we find on, and plan excursions to
Lee Vida or Mountains which we do not care
not I am still dressing at the Academy
Exhibition Every now & then something of
interest and making Shirt- Specimens
Have not been scarce since I returned from
Los Angeles. We are to have Lemmon & Bryce
as our guests tomorrow, and then back we
plan a trip to Neva Valley or Sta Cruz
Just now I am interested over a find at
the Mojave Station, nothing less than a
new species of Nemacaulis or Hollisteria!!
I so I suspect something between- which will
"smash" Hollisteria, and establish Nemacaulis
(Convolvulus) by 3 undoubtedly species. I have
written to Cleveland for specimens & then expect

110 O'Farrell St. S.F. Aug 6th 1881

Yours of July 31st to hand. Frasera in Col. ale F. speciosa, Campanula uniflora L? always three flowers here. I have written & sent Dates to Empire. I have sent you before Wislizenia from Salt Lk. which you presume in calling Clemella. I have it again and am sure it is an old Rio friend. Clemella obtusifolia Torr. does not pertain well to our Mojave plant. I shall have to go again and collect more also a new Nemacaulis: which is a good one. I go there nearly Every Day. Lemmon & wife start for Mojave next week. Many of your Pringle not turned up yet. Cleveland of San Diego in town. He complains that you did not send as much as you promised. went to Mex 13 of Castroville. I told him you were out long ago. He is hungry. will not collect Epilobium. RR pass due Sept to collect to be finished by New year! 35° Parallel next year. Living Peacock Sp.! You must take it, woolen Rs— the filamentis. Get Scouler Indians to pass you over his new lines to Durango! and then here.

Duncan Brewer from Calistoga (dent) Jan 1882

Dear Dr

I just got your note of 11th last. You
seem nearly as active and lively as a San Francisco
boy. As I have written to Prof. Gray
& have just returned from a 3 days trip to
the Sierra Nevada Mountains, finding plenty
of Clematis Atragene in good condition. I
find it just fragrant among the Alpine
cliffs & fine flowering & climbing conifers
in the mountains from the lake level to
I dare not shoot specimens near 2/L ecorce
always fearful I like you will get into
a perfect Dermidium. The Army officers
in the Lower air very pleasant.
I also send specimen Salix Wolfii Muhlenbergia
Mimulus rock & abundant than I ever saw
A in the Rio Grande.
I send) some of my notes Mimulus Nanus & Cuscuta
on Sea Eriogonum (and) shall finish shortly
for Distribution after I meet in my travels

"What to do with it" Parish also sends me a remarkable n. sp. of Oxytheca with a complete crown of irregular rays from the summit of an obconic involucre. I suppose I shall have to name it & Parish but would prefer O. exornata with the consent of the present character it fully in very well with the genus and what is still more interesting from the same range of sex dimorphism. Also Wright sets Oxytheca perfoliata, withinside any Nuttall so at present I am inclined with to Eriogonum, Brandegee examined carefully Hollisteria but finds Nevadensis & completely the dimorphism of these allied genera - must wait for Cleveland to return to San Diego & then I shall write I send your letter to to Behr - Shall I suspend & wait at Nevada. So I suppose that will be your address to the letter just sent to Fruitvale Cal. As you postpone date question till your return to SF Lemmon. I can only say I sent Q. Brandegee also to me of Fruitvale

Sept 30th 1881

Dear Dr

Welcome home again to this world of hustle. I have been pretty active (for lazy me) scouring the country 100 miles round for "fun weeds" and such trash, Engle does not report very fully from Oregon. he has been to the Dalles for- -tune accidentalis. and was going to Dr Hepburn Mt Hood for Alpine amabilis &c

We go next week (Keene & I) to Summit (Lake Sh.) to look at conifers and dig roots for Stanford, Park. Hope we shall have a warmer time. Then last year I not get lost!

I have been to Stockton for a few days looked up Lowrie Hemisphaeria Oregonensis Keenii. and Letter a new Cordyceps or a most remarkable Sphaeria about 9 in. long & C. inches thick like a policeman's club. as long as many Xylaria, from I shall save the club & send him both. Keene was quite elated on our last trip to Napa to find Lepiota Engleri. which turns out to grow (and rot) in abundance on the Pines!

Perennial Sch[ool]s. It means to disappear in
South about Berkeley & Sta Clara valley &
in Spring giving an orange color to the fields
We will get seed for you to test the perennial
character.

Parish was going to Sta Monica. I changed him to
Lodi not for the San Gabriel Oaks

I sent you a parcel with acorns, & the
annual (spurious) Q. hirtigeni? at least so I
took it, from Salt in Sacramento Valley.

Simmon & Wesp Slide dede in Arizona. Just
Keep dry & Attach "Care Boys"

Dunn has gone down to San Diego for Palm
Leaf & Pinus Parryana!

Enclose a late letter from Ihm Mann in Pa-
cific. We are now lighting in Napa, Sun-
to Stanislis. You know how fond they are.
When you get ready to work we shall have fun
for ... I am almost working for leisure
and to arrange plants instead of killing them etc.
We have had fortune in better choice on the Sunny side
of the house. No damp or mildew! You DO not mind
on the quantity of my writing to have a sample for Asa
Yours truly

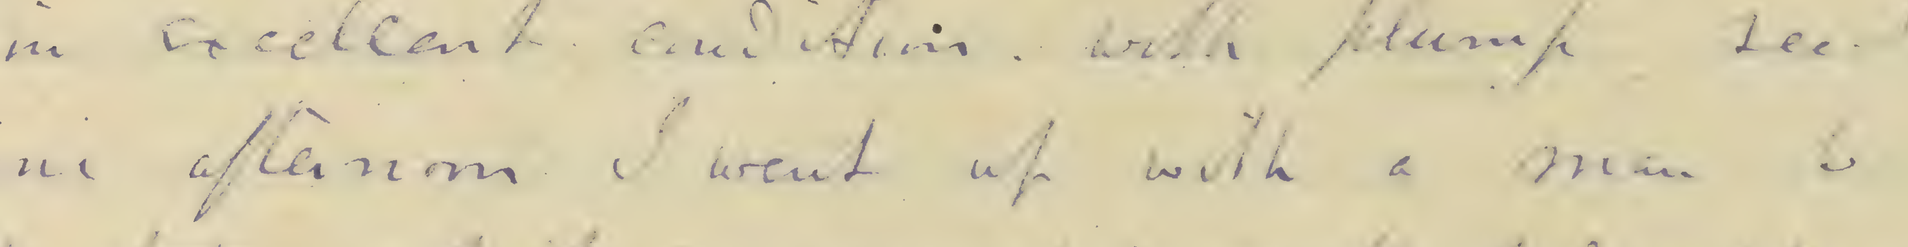
110 O'Farrell St San Fran.
Oct 7th 1881

Dear Dr

From - Oct 1st finds me just returned from a trip to the Summit. I need not tell you how cold it was, with snow in the ground and ice in our sleeping quarters. Soda Sp Station is abandoned with nothing to eat and the trains out skip to let all such fellow travellers as expect to find comfortable quarters at midnight. Fortunately we took grub & bedding with us and finding a store + plenty of wood + water made ourselves comfortable? The next Day we tramped over our old ground where you did not get back, looked into your Lizard's lake without venturing to "break the ice" and examined our burrows in cutting down trees. Many specimens of Lizards which were loaded with Eggs in excellent condition, with plump legs. The same afternoon I went up with a man to Summit Station which is occupied, with telegraph. He built no fire, kept following Dr Kellogg's directions, he found a pair of Lizards but without finish. In going from there I collected Leaves by trees for the Stanford Park. I beat a retreat to



a warmer climate, taking a Dry Height from
C° Sud. a magnificent Forest of Mount Shasta for 20
miles. but beyond Blue Cañon we came into the
open forest and a fine succession of Conifers
Sugar Pine Sabiniana —
But on the Inspector to hear about Oaks
which I can say not reaching Auburn
until at Sun Set — Reached the nearest Hotel
and Studied a Locket full of Acorns &c.
the Bismark Style. Stood me myself and our
Hotel with Dry Light, showing Quercus
Q. Douglasii in full fruit — to Time.
Now in regard to the puzzle which shielded your Eye
lids a widey. The last specimen sent from
a pencil sent to Dr Kellogg. I have not the exact
data if from locality, but will get it. my impression
is that it is a lowland form of Sacramento valley
Blue Q. lobulosa. which finding a Green Leaf Sample
to Crowd upon me changes the Scenario &
Cannot? perhaps annotate, the Same — the
Cannot & perennial Lobulosa? Look on it and
like Investigate? I must go. & see perhaps I
will, at least expect all obtainable information
at that give, like you keen glance into

MISSOURI BOTANICAL GARDEN
GEORGE ENGELMANN PAPERS

Oct 7, '81

I also was quite disgusted with Mrs. Gilman's article in Scribner, differing all the antiquated names. and sketches that would answer for anything else. the book is just broken backed Surgeons accidents, but I see it again in the Summit.

M is at last accounts, in the Locke at Lodi gone a-sketching. I'm not sure.

I sent a letter yesterday down to declined to go with me to the Summit, and thinks of nothing but Tar weed. cannot see an oak or pine. He will & what he can & help Joy in Lodi. they have now in four conditions. Mat small one has collected in Los Angeles, & sent branching thing in Pacific near San Bernardino. I have written them to make sure "Tar weed" specimens shall have a "batch" of two

I suppose Mr May Lowe pic Scott or we before Mrs M Lowe go Sun in France

Soon I shall establish botanical head quarters at Collyn. and meanwhile I collection shall occasionally run down into the South & Arizona. and return South in the Spring

to find you in Europe?

If they would only be easy. but so, Constable Hill in Los Angeles. he should ready be seen for a berry receptacle of the Mexicans in Yuma in August?

Yours truly

C. C. Parry

I am satisfied the new Mexican Grapes will come into Vemacaulis. (V. carnosa) Nelson found one South of the Nuttallian Plant. Hollisteria is hardy to Chicago, but may also come in. A new Hysterea from Panoche / Nelson was pleased at my finding a genuine Chorizanthe with 2 ♂ in his Cr Specimen. Confirming his view of including Centrostegia in Phoxanthe.

My Dear Dr

We are finally settled down in winter quarters but such a winter! I am now sitting in my botanical den with doors open shouting over the excitement of opening box & spreading out plants long boxed up. Pringle just in an unexpected appearance on Monday. Stayed over Sunday and left yesterday for Fremont! Expects to return in February. Hopes to visit you then. Greene is rushing into print at a great rate Gray encourages him to publish on S/A and so between preaching & printing he is in a fair way to notoriety? He expects to come down here about the holidays spend a few days & then go in to Silver City & may Smuckey pocket a big fee & then back with his plants & books for Berkley. Or perhaps conclude to go back to N Mexico. I may go down with him to Mancos & take a run down on to the Desert as far as Maricopa with Pringle to see what prospect of winter botanizing. Collect Cacti &c &c In any return will go to work at my plants arranging & studying as far as I can without books or your sage advice

Patterson has got me up some nice lichens. (Specimens
enclosed) Plenty to follow, when I make up a parcel
A junction has now been made with Texas Pacific RR
at our old Mex. 1859 Station at Eagle Springs. You
must save up for a trip over that.

Lemmon is at work in his way in his big new
collection. Has printed in The Californian a bombastic
account of his wedding botanical trip to Arizona
(irrepressible!). Mr Bayley intimates that you were
still oppressed with domestic anxiety. I had hoped that
your mother had recovered, and that you might
conclude to join us before X mas. The R.R. is
so approaching Mex as you can see. It probably
shuts the Ocean shore as far as Texas is concerned.
This much by way of reminder that I am waiting
for Correspondence. Mr Bayley in regard and hopes
that you may come soon. & believe my Dear

Very truly yours

A. Gray

Colton Cal.a Dec 14th 1881

Dear Dr

"Amabilis" "(alias Mrs I. S. Lemmon) makes a pitiful appeal to me to induce you to change the "jaw breaking" specific name I their new expressus to C. Lemmonii.' Engel Sarg. you are indebted to him for all the complete material which he collected at the "risk of his life" and among all his botanical acquaintances you are the only one who have not "honored" him with a Lemmonii.' here is the argument in brief. Of course she over-estimated my influence over you. but there may be greater; at least you will reconsider the matter. and so that is best. I know your instinctive dislike to such intimations. but you have a nice way of crawling out; for instance if Pringle collected the same the appeal would lose its force. if I should turn out an older Mexican Sp. you will get off with flying colors. which of these 3 horns of the dilemma will you chose?

I have been down to Los Angeles for a day to lay in some supplies. looked at the few trees of Quercus oblongifolia left from the woodmans axe. which are still keeping their leaves so I suppose they may properly be regarded as Semi-Evergreen i.e. keep their leaves till the Spring growth commences, differing I think from Q. Wislizeni which retains its old leaves till the 2.d fall

Freeman writes he may be down between Xmas & New years on his way to Silver-city. to perform a marriage ceremony has deputized me to have ready a bale of orange blossoms. & go with him & join them later!
